

PARTHASARATHI RV

Senior Software Engineer (SDE-IV) — Full-Stack & Applied AI Engineering

Bangalore, India (open to relocation, worldwide) | +91 807-282-0792 | rvparthasarathi@gmail.com | [linkedin.com/in/iampartha](https://www.linkedin.com/in/iampartha) | github.com/codesof-partha | codesof-partha.github.io

PROFESSIONAL SUMMARY

Senior full-stack engineer with 7+ years building and leading production systems in React, Next.js, Node.js, TypeScript, and Python across ed-tech and B2B SaaS. Currently SDE-IV at Bhanzu, leading a team of five engineers and owning platform architecture across microservices, AWS, and Kubernetes. Specialize in applied Generative AI — designing and shipping LLM-powered products (RAG chatbots, automated content-generation pipelines) that replaced manual, multi-team workflows with single-minute automation reaching 80% team adoption. Combine deep front-end craft, cloud-native backend design, and hands-on AI/LLM integration.

CORE SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React, Next.js, Node.js, Express.js, Zustand, HTML/CSS/SCSS

AI / Generative AI: OpenAI API, LangChain, RAG pipelines, prompt engineering & fine-tuning, LLM product design (Claude, ChatGPT)

Cloud & DevOps: AWS (EC2, EKS, Lambda, DynamoDB, RDS/Aurora, S3, SQS, ECR, Secrets Manager), Docker, Kubernetes, ArgoCD, Webpack

Data & Testing: MongoDB, MySQL, DynamoDB, Playwright, Storybook, Lighthouse, CI/CD

Architecture & Practice: Microservices, system design, API design, code quality & security review, Agile/Scrum, mentoring

Tools: Git, Figma, JIRA, Confluence, Bitbucket, Grafana, PagerDuty

PROFESSIONAL EXPERIENCE

Software Development Engineer IV · Bhanzu

Bengaluru, India | Aug 2025 – Present · Current

- Lead a team of 5 engineers (4 SDE-I, 1 SDE-II) owning platform architecture, code quality, scalability, and security across the company's core products.
- Set engineering standards and mentor interns and junior engineers on best practices, code review discipline, and system design.

Software Development Engineer III · Bhanzu

Bengaluru, India | May 2022 – Aug 2025

- Built and owned Admin Panel, Student Dashboard, and CLM Dashboard from scratch (React, TypeScript, Next.js, Python/Flask/FastAPI) on a microservices architecture (AWS Lambda, S3, API Gateway, DynamoDB, ECR, SQS, Secrets Manager; Docker/Kubernetes/ArgoCD). Ran the build on an Agile/Scrum cadence and profiled the stack for performance, cutting page-load times and API response times and speeding up release velocity across the platform suite.
- Designed and shipped DoubtGPT, a curriculum-grounded RAG chatbot (OpenAI + LangChain) that resolves student doubts in real time; iterated on fine-tuning to improve response accuracy.
- Built Ed-Reels, an OpenAI + Manim pipeline that auto-generates short-form math explainer videos for students.
- Won a company hackathon for Bhanzu's AI Writer: an OpenAI-powered tool that generates session summaries, video scripts, and question banks, cutting curriculum-design work previously requiring ~40 core employees down to a one-minute automated run and reaching 80% adoption across curriculum teams; extended it to auto-build full curricula by grade and topic.

Software Development Engineer II — EngageWith · Springworks Inc.

Santa Monica, CA (Remote) | Apr 2021 – May 2022

- Served as Scrum Master and full-stack lead for EngageWith, a Slack/Microsoft Teams employee-recognition and rewards platform, using the MERN stack, AWS, and Gatsby.
- Drove SEO optimization and front-end performance best practices across the product.

Software Development Engineer I — EngageWith · Springworks Inc.

Santa Monica, CA (Remote) | Sep 2019 – Mar 2021

- Full-stack developer on EngageWith (MERN stack); integrated the Stripe Customer Portal for subscription payments and xoxoday for reward redemption.

Research & Development Intern · Indian Institute of Technology, Madras

Chennai, India | Feb 2019 – Aug 2019

- Implemented GLCM and RANSAC-based computer vision algorithms to unwrap and stitch robot-captured video into 3D reconstructions of inspected pipelines — the core technology later commercialized as Solinas Integrity.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

Anna University (AIT) · 2015 – 2019 · CGPA 7.5 · Best Outgoing Student · President, Rotaract Club

CERTIFICATIONS & AWARDS

Microsoft AI Tour (Global AI Community) · Machine Learning Crash Course (Google) · AWSome Day Online Conference (AWS) · EMC Academic Associate · Intelligent Systems (Intel) Hackathon Winner — Rethink Passion & Bhanzu (AI Writer) · Best Project Award · Best Presenter, Student League at IIT Madras
